

Environmental Policy

WDS strives to achieve a high standard of environmental awareness and sensitivity by working effectively in a diverse range of environments and social settings.

WDS recognise the importance of integrating environmental management into normal business practice.

In particular WDS's policy is to:

- Minimise the adverse impact on the environment as a result of our business activities;
- Operate in compliance with applicable environmental laws regulations, standards and community best practices;
- Provide financial resources necessary to operate in full compliance with all applicable environmental laws, regulations and standards; and
- Ensure that senior management and all personnel of WDS engage in responsible and ethical management of environmental programs.

To achieve this we will:

- Establish and maintain an Environmental Management System in accordance with AS/NZS ISO 14001;
- Comply with contract conditions, relevant legislation and other criteria to which the company subscribes;
- Regularly review operations, identify and implement opportunities for improvement;
- Educate our workforce of key environmental concerns, controls and responsibilities;
- Establish measurable environmental targets and objectives; and
- Take all reasonable efforts to avoid pollution, reduce waste and commit to reuse and recovery where feasible
